

Hamidreza Hedayati

FRONT-END REACT.JS DEVELOPER

ABOUT ME

I have always been passionate about computers and programming. With a creative mindset and a strong interest in technology, I decided to pursue a career in front-end development, even though it wasn't related to my academic background. I joined the Daneshkar Bootcamp, where I gained valuable experience over 6 months and worked on real-world projects.

EXPERIENCE

Bootcamp: Daneshkar Bootcamp (Dec 2024 – Jun 2025)

PROJECTS

Recipe Finder

A responsive and user-friendly recipe search app built with Next.js and TypeScript, using the Spoonacular API. Styled with SCSS and supports searching recipes by food name and more.

Expense Tracker

Developed a responsive expenses tracking application using React.js, SCSS, and Tailwind CSS. The app allows users to enter wallet amounts, manage expenses, and visualize data with charts.
